Magic Concentrate-to-Spray

No.: 873

PHASE	TRADE NAME	INCI	%	FUNCTION
A	Nafol® 1618 H ¹⁾	Cetearyl Alcohol	26.00	Consistency Agent
A	Cosphaderm® Pentiol natural ²⁾	Pentylene Glycol	9.00	Alternative Preservative
A	SOFTISAN® GC8	Glyceryl Caprylate	0.80	Multifunctional (Enhances Anti-Microbial Stability, Heat Stability and Wetting)
A	MIGLYOL® 8810 ECO	Butylene Glycol Dicaprylate/ Dicaprate	3.00	Water-Light Emollient
B	SOFTISAN® MagicPOWDER S	Tricaprylin (and) Acacia Senegal Gum	50.00	Magical Transforming Ingredient
B	Agenajel 20.306 ³⁾	Distarch Phosphate	6.20	Rheology Modifier
B	Maisita 9040 ³⁾	Zea Mays Starch	5.00	Sensorial Modifier

¹⁾ Sasol, ²⁾ Cosphatec, ³⁾ Agrana

PROCESS

1. Mix phase A and heat to 80°C
2. Weigh phase B and add to A in small portions
3. Keep phase A/B at 80°C and stir with a spatula – Please note that SOFTISAN® MagicPOWDER S will not melt
4. Pour into molds and allow to cool

Let the magic happen:

Add 3 parts boiling water to a part Magic Concentrate-to-Spray (weight) and mix with a milk frother; allow to cool if needed

FORMULA DATA

- Appearance:** White solid
- pH:** n.a.; 5,5 (3 water : 1 formula w%)
- Viscosity:** n.a.
- Stability test:** Passed (solid); Once mixed with water, this formula is designed for single use/mono-dose.
